

TEMPERATURE PROBE

PT100

Allows an accurate temperature reading
Used on LR-MS, Pool Command, Pool Guard
Large temperature range
High precision

DESCRIPTION

A PT100 probe is a type of temperature sensor also called an RTD (resistance temperature detector). The PT100 element has a resistance of 100 ohms at 0 °C. These sensors are fitted with a protective sheath or mounting to form a temperature probe, and these are commonly referred to as PRTs (platinum resistance thermometers) or Pt100 probes.

CHARACTERISTICS

PROBE	PT100 3 fils Class B
PROTECTIVE SHEATH	INOX 316L
FRAME DIMENSION	Ø 6mm Length 100mm
CABLE	PVC / PVC
LENGTH	3 Meters
ASSEMBLY	WATER PROOF
OPERATING TEMPERATURE	From -40 °C to 105°C
CABLE LR-MS	ORANGE WIRE N ° 1 ON 1 OF THE 2 RED WIRES ORANGE WIRE N ° 2 ON WHITE WIRE
